

IPMation™

APPLICATION SUITE

IP Assets Strategic Management

VajraSoft Inc. IP Mation Application Suite helps customers maximize their value, ROI from their patent portfolio. It is critical for managing IP's as strategic asset. This most comprehensive IP application suite enables global patent portfolio management, patent protection management, IP filing cost estimation, IP monetization, managing IP Assets and measure the extracted value, and increase revenue.

Business Challenges

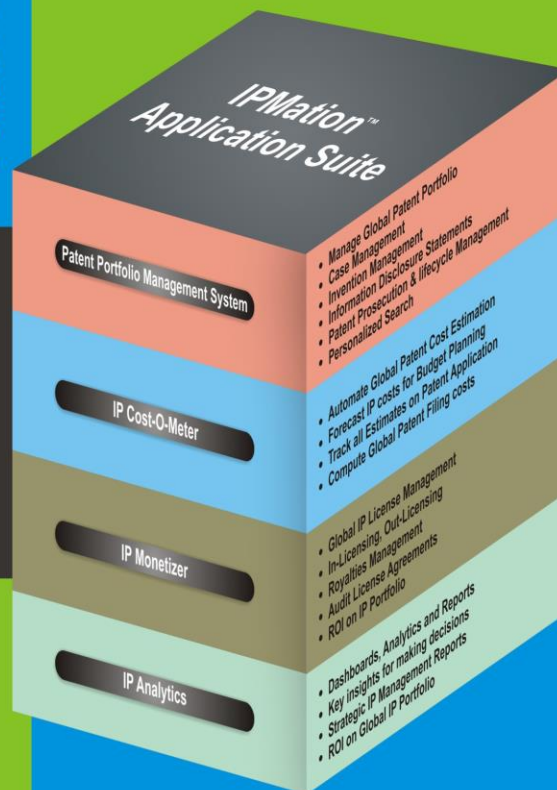

One of the main challenge encountered by Chief Legal Officer (CLO) managing Patents (IP's), is to know on how to tap the innovations / inventions from potential inventors? Another key challenge faced by CLO is the lack of appropriate systems to identify and support innovation starting from idea generation, submission through patent application, prosecution life cycle as well as measuring the monetization of IP's. A day-to-day challenge for IP Managers is to look for ways and means to accomplish automation, aligned to business process.

Solution

IPMation Application suite identifies the patents of strategic value for the business. The Case Management module allows inventors to submit potential inventions for patent committee review. The application suite - manages global patent portfolio, prosecution management - filing of patent applications, amendments, information disclosure statements, assignments, managing patent life cycle, global IP cost estimation, IP license management and monetization and IP / Patent analytics. The application provisions to define and monitor possible due dates, responses to office actions, filing dates, annuities - maintenance, renewals and reducing the costs.

IPMation™

Application Suite

IP Wayz - Global Patent Portfolio Management System
